HELP YOU WITH COMPLEX
MECHANICAL ISSUES**

PLUS SUPPORT ON:

- Performing an action already integrated in Jaltest
- Jaltest will not clear these fault codes
- Why can't I perform the regen
- Jaltest fails to perform a reset or system test
- Help modifying a parameter
- Issues connecting to a machine or truck
- Help with using multi pins
- Cannot connect to a specific system
- Check engine light on the instrument cluster that will not show in Jaltest
- Help with customer/factory passwords (we will not provide them)
- Assistance with injector coding/component calibrations
- Have followed the troubleshooting in Jaltest and performed all steps but cannot fix the issue
- Request the description of an unknown fault code or access to a new software variant
- Request install by Cojali USA when there are no issues
- Need a wiring diagram but it is not in Jaltest
- Need help performing a Cummins calibration revision (it will be a part of the Jaltest RDP service. Control by tickets, promotional in ATS level 2)
- Need to perform a system test or maintenance reset but it is not in Jaltest
- Need troubleshooting guide for a fault code that is not in Jaltest
- Need to modify a parameter but, the option to do so is not in Jaltest
- Need to connect to a new system but it is not covered with Jaltest
- My vehicle is not covered (restricted to the same segment that the user has license in forced).

**This is a yearly license linked to an active Jaltest License.
Monthly Support available to match up with current expiry dates.**

ONLY \$1495/Year
